LINDE OXYGEN

Largest Producer of Oxygen in the World

The Linde Air Products Company is constantly working to enlarge its usefulness and improve its service. This service to Linde users has resulted in Linde becoming the largest producer of oxygen in the world.

Well-Organized Delivery Service

Linde Oxygen is available in every manufacturing district in the country. A well-organized system of distributing stations provides dependable service to Oxygen users. Thirty-eight plants and seventy-seven warehouses make up this great service chain, every link of which has behind it the strength and facilities of the entire chain.

District Sales Offices

Correspondence regarding prices, terms, etc., should be addressed to the nearest District Sales Office. They will be glad to arrange to adequately take care of your oxygen needs, and to give helpful co-operation and advice on any matters involving the use of Oxygen. Linde District Sales Offices have behind them every resource of the entire Linde organization.

These offices are located as follows:

Atlanta	Dallas	Philadelphia
Baltimore	Detroit	Pittsburgh
Boston	Kansas City	St. Louis
Buffalo	Los Angeles	Salt Lake City
Chicago	Milwaukee	San Francisco
Cleveland	New Orleans	Seattle

PAX-TITE
LEATHER PACKINGS

For Hydraulic Pressure, Compressed Air and Other Purposes Where High Quality Packings Are Required

We have been building hydraulic machinery for over 75 years and found early in our experience that a perfect packing could not be bought. We, therefore, experimented with various materials and designs in order to produce a satisfactory packing. These experiments have led to PAX-TITE packings, which we present to the trade with the assurance backed by our long business success that these packings are the best that perfect material plus careful workmanship has yet produced.

Is it not logical that the packings we put in our own machines, upon the performance of which depends our business success, are the best adapted for the purpose?

This should appeal to you strongly. It will mean trouble eliminated, delays avoided and the efficiency of your machines increased.

DU PONT

PAINTS AND VARNISHES

THE products of the Paint and Varnish Division of the du Pont Company represent a full line of products, including paints, stains, enamels, fillers, varnishes, colors, japans and driers.

These products are supplied for trade as well as industrial users, and represent a specialized development to meet individual requirements.

The du Pont line of Paints and Varnishes at present has been developed to the point of standardization where each product stands for highest quality for the purpose intended.

STANDARD FOR OVER FIFTY YEARS

Weight for weight, Root Spiral Riveted Pipe is the strongest, most durable pipe made, and the most economical in the long run. It is used for water supply, exhaust steam, condenser lines compressed air, fluid conveying of any kind, paper and pulp mill service, textile mills, dye works, ventilation, irrigation, hydraulic mining and in fact for any pipe service.

This pipe is furnished either asphalted or Galvanized and with Flanged, Bolted or Slip Joint. Made in all sizes, 3″ to 30″ diameter.

Write for Catalogue No. 41. It also describes and illustrates Root Water Tube Boilers and Root Exhaust Heads.

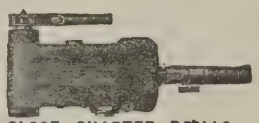
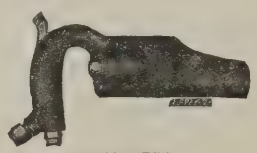
PNEUMATIC TOOLS



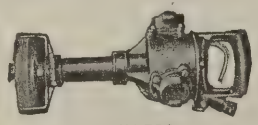
RIVETING HAMMERS

Distinctive in design and with superior power and ability to resist abuse. Built in suitable sizes—with inside or outside triggers, for all grades of work, and with or without safety rivet set retainers. Spend more time at work and less time in the repair shop than any other hammer.



PNEUMATIC DRILLS

Reversible and Non-Reversible. For drilling, reaming, tapping, flue-rolling, running down screws, wood boring, etc. Built in a complete range of sizes and gearing combination—a tool for every grade of work. Without equal in simplicity and sturdiness of construction and economical operation.



CLOSE QUARTER DRILLS

A special design pneumatic drill for work in corners and places where other drills cannot be used. Very simple and rugged construction with half the number of parts of any other tool for the same use. Develop fifty per cent more power than any similar size drill. Built in two sizes.

CHIPPERS

Built in nine types and sizes. With features different from any other chipper. Handle is securely bolted to barrel, overcoming troublesome features in previous types of chippers. Unequalled in low cost of maintenance.

GRINDERS

Especially designed for grinding work and operating at high speeds. Not an adaptation of another type tool. Built in three types and sizes. They are light in weight, high powered, free from vibration and stand up to the severest of grinding work.

AIR MOTOR HOISTS

Built in five sizes, capacities ½ to 5 tons. Consist of high-duty air motor geared to hoisting drum and very efficient in operation. Features are safety, perfect control, no vibration and cannot be injured by overloading.

SAND RAMMERS

Both Floor and Bench Types. Ingersoll-Rand Rammers have been standard sand rammers in majority of air equipped foundries for over twenty years. Known for their ability to turn out most work at least cost. Also used for backfill ramming.

Little Giant Portable Electric Grinders

Made in several sizes for operation on either A. C., D. C. or "Universal" current.

Little Giant Portable Pneumatic Grinders

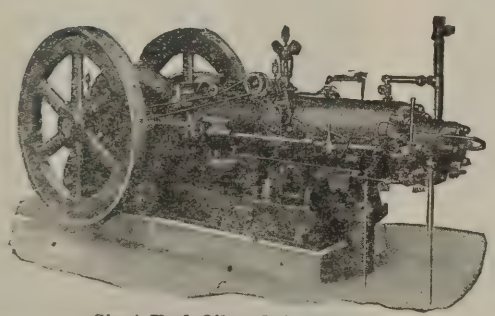
Easy to handle and control, economical to operate. Made in a complete line.

CP-5 Drifter

A light weight machine (118 lbs.) that equals the performance of 35 to 60 lb. heavier drifters, with an easier operation, longer wearing ability and lower maintenance.

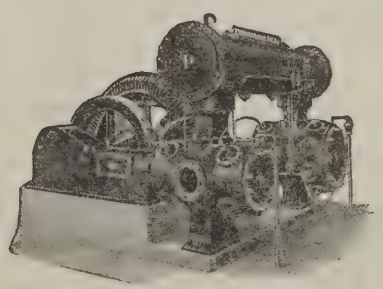
Little Giant Pneumatic Hoists

Made in capacities from 1 to 10 tons, both portable and trolley mounted types.



CP Sinker Drills

Depth, 10-16 feet. Their light weight, operating economy, reliability and high drilling speed have made them a success wherever used.



Boyer Holder-Ons

A handy labor-saving device for holding rivets in place by pneumatic pressure while they are being driven.

Giant Fuel Oil and Gas Engines
Made in both single and duplex types.
Capacities from 20 to 250 H. P.

Chicago Air and Gas Compressors
Made in over 500 sizes and styles—stationary, semi-portable and portable types in capacities up to 4,424 cu. ft. per min.

Pressed Steel Oil Pan for Automobile Motor Taking the Place of an Aluminum Casting

It will pay you to get into touch with us on such stamped or pressed sheet metal articles or parts as you may require. Even if you have your own facilities you can reasonably expect that it is likely we can do your work better and cheaper because of our specialized knowledge and experience. Also, if you are using castings, drop forgings or wooden parts, there are available to you many opportunities for converting such parts into pressed metal at a saving and at a gain in utility.

TO USE THIS BOOK EFFICIENTLY

Read This Page NOW—and Save Your Time When You Are BUSIER

Address and Local Distributors Section—

Beginning on page 7, gives the names and addresses of manufacturing and other concerns, with branch offices and local distributors of many advertisers.

Index to Classifications of Products—

Beginning on page 351, shows all items of Material, Supplies, Equipment, Machines, etc., indexed and cross indexed in the terms that come first to your mind. Thus "Dredging Buckets" are shown as "Buckets, Dredging," and as "Dredging Buckets." It is preferable, however, always to look for the NOUN.

Classified Products Section—

Beginning on page 501, lists under the name of the product the names of the manufacturers of this product. That those shown in black-faced type are especially equipped to quote is evidenced by their readiness to spend money to secure your inquiries—it will pay you to write them.

All Products are listed alphabetically according to the noun, excepting in the case of "Machinery" and "Textile Machinery," which for your convenience are brought together into two main groups, the former embracing classifications 7671 to 9499 and the latter embracing classifications 14993 to 15489; here the various kinds of machines and machinery are subclassified, each with its own classification number.

Sometimes a general classification, such as "Lumber," appears. Subclassifications appear immediately following the general list, however.

Various trades are listed, also, such as Architects and Contractors. In the larger lists the arrangement is geographical, for your more ready convenience. In the smaller lists the arrangement is alphabetical as to firm names.

Classification numbers, corresponding with the numbers in the Index to Classifications of Products, are shown above the outer column of each page.

If you refer directly to the Classified Products Section, look for the NOUN, thus, "Wardrobes, Office," not "Office Wardrobes."

Tradename Section—

Beginning on page 2301, carries the trade-names of all articles in industrial use put out within the past twenty-five years. We have thousands of additional trade-names on file, however. If you know a trade-name but not the name of the manufacturer, use the Trade-name Section.

And Remember—

We have a Complete Service Department ready to give you any further information or assistance you may desire.

Cameron Pumps

Cameron Piston Pump.

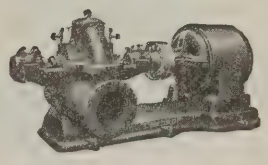
Cameron Plunger Pump.

Cameron Multi-Stage Motor Driven Pump.

Cameron Pumps are built in direct-acting or centrifugal types and in sizes suitable for every fluid handling problem. They are simple in design, sturdy in construction and every pump is thoroughly tested so as to exactly fit it to meet the conditions for which it was sold.

The direct-acting Pumps can be operated either by compressed air or steam. The Centrifugal Pumps can be either belt, electric motor or turbine driven, or can be arranged for direct-connection to gasoline, oil or gas engine.

Cameron Piston Pumps are especially adapted for general service, boiler feeding or mine work. The water cylinders are made with fixed or loose lining, or entirely of our special acid resisting metal. Built in capacities from 10 G.P.M. to 1000 G.P.M.

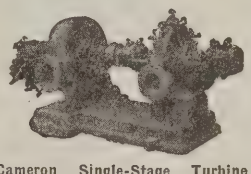


Cameron Plunger Pump has all the economical operating features of the piston type, but is especially adapted to handling gritty water. The water end has no wearing parts, except the packing in the stuffing boxes, which can be instantly adjusted from the outside. Built in capacities from 10 G.P.M. to 1200 G.P.M.

Cameron Double Suction Volute Pumps are built in single units for heads up to 230 feet. Arranged in series, these pumps are satisfactory for heads as high as 460 feet. These pumps have capacities ranging from 90 to 20,000 gallons per minute.

Cameron Multi-Stage Pumps are built for pumping against heads as high as 1400 feet. They have from 2 to 6 stages in a single casing and twelve stages where two pumps are arranged in series. Their capacities range from 125 to 11,000 gallons per minute.

Cameron open-impeller, single-stage, double suction, Volute Pump is particularly adaptable to service in the pulp, paper and sugar industries, and also for handling sewerage because of the special double suction open impeller encased by shrouds.



A new Cameron turbine-driven Boiler Feeder is designed for boiler plants having up to 2000 B.H.P. and using steam pressure of 150 lbs. or less. The entire unit is simple and compact.

LAWRENCE CENTRIFUGAL PUMPS

are built for all classes of service, all capacities, and all heads. They are built both single-stage and multi-stage and with vertical and horizontal shafts, and are so constructed that all internal parts are accessible for inspection or replacement upon lifting the casing cover, and without disturbing discharge or suction connections. All parts subject to wear are made to limit gages, on an interchangeable basis, and are easily and quickly renewable.

Efficiencies are guaranteed. Pumps for specific conditions are tested before leaving the factory, and when requested purchaser is supplied with copy of test report.

TO USE THIS BOOK EFFICIENTLY

Read This Page NOW—and Save Your Time When You Are BUSIER

Address and Local Distributors Section—

Beginning on page 7, gives the names and addresses of manufacturing and other concerns, with branch offices and local distributors of many advertisers.

Index to Classifications of Products—

Beginning on page 351, shows all items of Material, Supplies, Equipment, Machines, etc., indexed and cross indexed in the terms that come first to your mind. Thus "Dredging Buckets" are shown as "Buckets, Dredging," and as "Dredging Buckets." It is preferable, however, always to look for the NOUN.

Classified Products Section—

Beginning on page 501, lists under the name of the product the names of the manufacturers of this product. That those shown in black-faced type are especially equipped to quote is evidenced by their readiness to spend money to secure your inquiries—it will pay you to write them.

All Products are listed alphabetically according to the noun, excepting in the case of "Machinery" and "Textile Machinery," which for your convenience are brought together into two main groups, the former embracing classifications 7671 to 9499 and the latter embracing classifications 14993 to 15489; here the various kinds of machines and machinery are subclassified, each with its own classification number.

Sometimes a general classification, such as "Lumber," appears. Subclassifications appear immediately following the general list, however.

Various trades are listed, also, such as Architects and Contractors. In the larger lists the arrangement is geographical, for your more ready convenience. In the smaller lists the arrangement is alphabetical as to firm names.

Classification numbers, corresponding with the numbers in the Index to Classifications of Products, are shown above the outer column of each page.

If you refer directly to the Classified Products Section, look for the NOUN, thus, "Wardrobes, Office," not "Office Wardrobes."

Tradename Section—

Beginning on page 2301, carries the trade-names of all articles in industrial use put out within the past twenty-five years. We have thousands of additional trade-names on file, however. If you know a trade-name but not the name of the manufacturer, use the Trade-name Section.

And Remember—

We have a Complete Service Department ready to give you any further information or assistance you may desire.

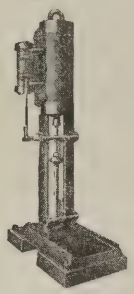
PRODUCTS

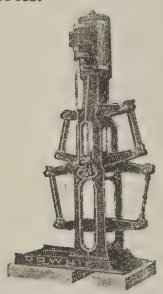
"Downie" deep well plunger pumps, single and double stroke, steam and geared. Described in Catalog No. 6.

"Downie" Centrifugal Pumps, single and multi-stage, horizontal and vertical. Described in Bulletin No. 801.



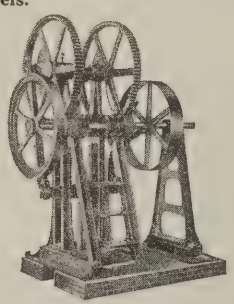
TRADE MARK DOWNIE REGISTERED U. S. PATENT OFFICE

"DOWNIE" DEEP WELL PUMPS

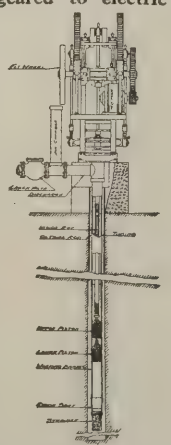


These pumps are built in a great variety of types and sizes to meet every deep well pumping condition where steam or any form of driving power is available. Capacities range from 85,000 gals. per hour using 18" dia. Working Barrel, down to 250-600 gals. per hour using 1¾" dia. Working Barrel. They are designed and constructed according to the highest standards of engineering practice, incorporating only accepted scientific principles of operation, and to obtain the highest degree of efficient, reliable and satisfactory operation with minimum cost of maintenance. The power heads can be furnished with any form of drive, belt, rope, chain, gear, or direct drive, from any type of driver.

"Downie" Single Stroke Deep Well Pumps, Steam and Geared—Are suitable for pumping moderate quantities of water from a given size well, and where power economy is not so important as it is to keep the initial cost of equipment at a minimum for reliable operation. Guaranteed efficiency on "Downie" Single Stroke Pumps—over 55%.



"Downie" Double Stroke Deep Well Pumps, Steam and Geared—Should be used where a maximum quantity of water is wanted from a given size well, and where the highest possible degree of power economy is desired. These pumps produce an absolutely steady flow of water at the pump discharge. The guaranteed efficiency of "Downie" Double Stroke Pumps is over 80%.



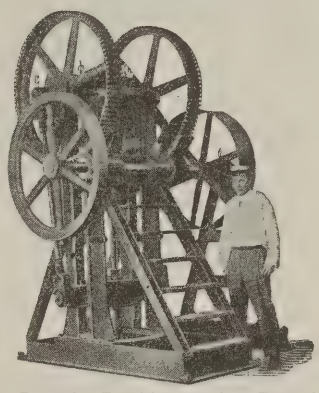
Downie Class "B" Single Stroke Steam Pump Head—24-inch Stroke for use with Single Plunger Working Barrels.

Downie Class "G" Double Stroke Steam Deep Well Pump Head for use with two plunger working barrels.

Downie Class "A" Double Geared Single Stroke Deep Well Pump Head, belt drive, for use with single plunger working barrels. Can be direct geared to electric motor.

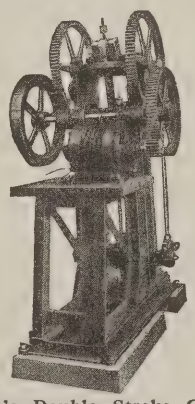
Typical Installation of Downie Double Stroke Geared deep well pump, direct geared to motor, showing two plunger working barrel in the well.

ENGINEERING SERVICE



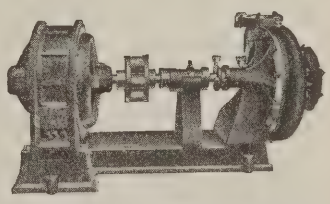
An Engineering Service Department is maintained by the **Keystone Driller Co.** which is especially prepared to assist in the selection of equipment to fulfill any condition of requirements in the most economical, reliable and satisfactory manner. Those contemplating the installation of deep well pumping equipment are invited to present their problems. This service is free and carries no obligation. In presenting these problems, if the following information is given as far as possible in first communication, it will save time and correspondence:-

1. Quantity it is desired to pump, per minute, per hour, or per day of so many hours. 2. Pumping depth below ground surface (or mouth of well) when pumping the desired quantity. Note: If unable to give No. 2, state, if possible, the natural standing depth of water below ground surface, and how much it lowered when pumping any given quantity, stating quantity. 3. Vertical lift required above surface (if any), or pressure per sq. inch, into pressure tanks or mains. 4. Dia. of well, down to where it is likely necessary to set Working Barrel, also state total depth of well. 5. State kind of power available and form of drive preferred. Also whether driving power is to be included with pump, and if electric, state voltage if direct current, and cycles and phase and voltage if alternating current.

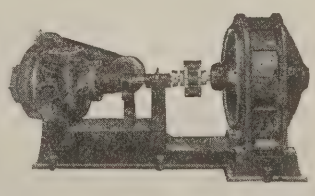


TRADE MARK DOWNIE REGISTERED U. S. PATENT OFFICE

CENTRIFUGAL PUMPS



These pumps include a great variety of types and sizes from 1" to 15" inclusive for capacities ranging from 15 to 10,000 gals. per minute, and to operate against total heads up to 500 ft. or 215 lbs. pressure. They are particularly noted for their ruggedness, simplicity, and exceptionally high degree of economical operation. They can be furnished with any form of drive, belt, rope, chain, gear, or direct drive, from any type of driver. Guaranteed efficiency of "Downie" Centrifugal Pumps—50% to 80%, varying according to size and operating conditions.



Downie Double Stroke Geared Deep Well Pump Head for heavy duty with two plunger working barrel. Cut shows belt drive type. Can be direct geared to motor or fitted for any other form of drive.

Downie Double Stroke Geared Deep Well Pump Head direct geared to electric motor, for use with two plunger working barrels.

Models "AM" and "BM" Single Stage Downie Centrifugal Pump direct connected to motor, for heads up to 125 ft. Sizes 1-inch to 12-inch discharge.

Models "AAM" and "BBM" Downie Two-Stage Centrifugal Pump, Direct-Connected to Motor, for Heads 125 to 250 Feet. Sizes 1-inch to 12-inch discharge.

General Pump Catalog No. 26

Catalog of Complete Water Systems

Bulletin of Rotary Pumps

Bulletin 310, Descriptive of Horizontal Power Pumps

Bulletin 300, Descriptive of Vertical Triplex Power Pumps

THERE IS A DEMING PUMP FOR EVERY PUMPING NEED

THE Deming Line includes "over a thousand pumps of different types and sizes." Regardless of what your pumping requirements are, there is a Deming pump built to fit those requirements. Forty-four years' experience in pump building enables Deming to give you expert advice on any pumping problem. Tell us the source of supply; vertical elevation from surface of water to pumps; elevation from pump to discharge; power available; purpose for which pump is to be used; approximate quantity of water desired, and we will recommend the pumping outfit best suited to your needs. Any one or all of the above catalogs gladly sent on request.

THE DEMING CO., *Est. 1880,* SALEM, OHIO

The nearest distributor is always ready to give your pumping problem personal attention and in nearly all cases can make immediate delivery from his floor

EXPANSION HAND REAMERS
with SPIRAL FLUTES!

The valuable feature of hand expansion permits adjustment for oversize reaming. A locknut holds the size; a safety stop indicates positively when maximum limit has been reached and prevents over-expansion.

The spiral flutes of this new P. & W. Reamer permit clean, free cutting action on all work and are of special advantage in reaming holes with keyways in them.

Where a straight flute reamer would chatter, the spiral flutes pass safely over the recess and give a smooth hole true to size.

We make Small Tools of all kinds in all sizes for every purpose. Fully described in Catalogue No. 11

THE POWERS REGULATOR CO.

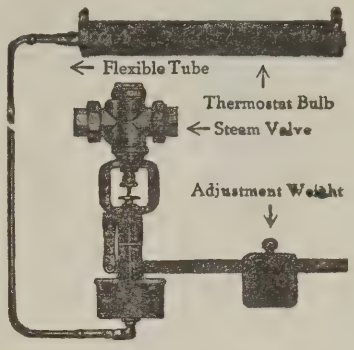
34 Years of Specialization in the Manufacture of Temperature, Pressure and Humidity Controllers

2773 Greenview Ave., Chicago, Ill.

NEW YORK—BOSTON—TORONTO—AND THIRTY OTHER OFFICES—See Your Telephone Directory

No. 11 Regulator

Controls temperature of liquids in Tanks, Vats, Condensers, Kettles, etc. Self-operating—needs no compressed air or electricity. Easy to install. Can be had for any temperature between 90° and 275° F. Range of adjustment 40° F. Gives years of accurate, dependable control. Valve is of the double-seated balanced type which insures greater accuracy and durability. Bulletin No. 129 gives full information and prices.



This Engineering Service Free

34 years of specialization in Automatic Temperature Control has given us a wealth of knowledge and experience which is at your command without cost or obligation. Consultation with our engineers may result in suggestions which will save you a great deal of trouble and expense.

Products

Shown here are only 7 of the more than 50 types of regulators which we have perfected to control the temperature and pressure of Liquids, Gases, and Air. We do not attempt to make a few devices fit a wide variety of conditions. Let us study your requirements and suggest the particular type of regulator which will give the *best results* at the *lowest cost.*

Absolute reliability of apparatus is of paramount importance in automatic temperature control. The adoption of Powers equipment by the leaders of American industry (list upon request) is strong indication of the prestige that our apparatus has acquired.

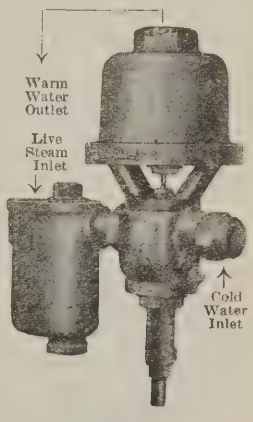
No. 15 Regulator

Controls temperature of air in Drying Processes, Kilns, Smoke Houses, etc. Entirely self-operating. Is easy to install. Can be had for any temperature between 60° and 275° F.; range of adjustment 60° F. Gives years of accurate, dependable control. Valve is of the double-seated balanced type, which insures greater accuracy and durability. Bulletin No. 138 gives full information and prices.

Dial Thermometer

Designed particularly for use where poor light and inaccessibility make the ordinary thermometer hard to read. Ruggedly built; accurate and dependable. Reasonably priced. Can be had with horizontal or vertical rigid stem or flexible extension stem up to 100 ft. in length. Dials are white, 4-in. diameter, with large, readable figures in black. The cases are brass, nickel plated. Can be had for various ranges of temperature. Write for booklet on Industrial Thermometers.

Temperature and Humidity Control for Factories, Offices, etc.

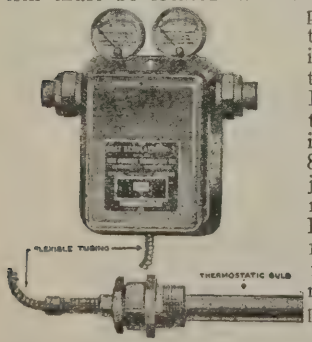


Powers K Thermostat

The chief savings of room temperature control are increased production and improved health of workers, reduction in the number of accidents, and a fuel saving of 20 to 48 per cent. These claims are substantiated by many tests conducted by impartial and recognized authorities. (We shall be glad to submit proof of claims made.)

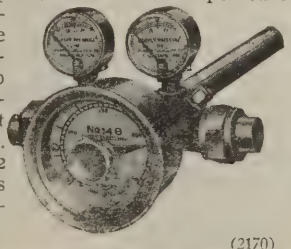
For more than 30 years, Powers Systems of Temperature Control have eliminated overheating in all kinds of buildings, and with our large organization, we are able to render our clients the best of service.

Full description of our apparatus, list of prominent users, and installations which have been giving accurate, dependable control for 20 to 25 years, will be found in our book, "The Elimination of Heat Waste."



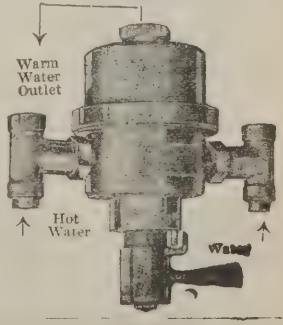
Instantaneous Water Heater

A steam and water mixer. It heats water with high pressure steam. Simple in construction and easily installed. A big money saver when used to heat water for Factory Washrooms, and on all industrial processes where an instantaneous, economical supply of warm water is desired. Absolutely safe against overheated water. Bulletin No. 137 shows application, prices, and full information.



No. 21 Regulator

Designed for exceedingly accurate control of air, gas, or liquid temperatures of heating and cooling mediums. Compressed air operated. Sensitive to a fraction of a degree. For use where adjusting mechanism must be located at a distance from point where temperature is to be controlled. Range of temperature is Zero to 800° F.; adjustment range 100°. Bulletin No. 147 gives full information and prices.



No. 14-B Regulator

Gives exceedingly accurate control of air, gas, or liquid temperatures. Compressed air operated. Designed for conditions where the adjusting mechanism is located at the point where the temperature is to be controlled. Range of temperature is Zero to 800° F.; adjustment range 200°. Bulletin 132 gives prices and particulars.

Thermostatic Water Controller

Mixes hot and cold water. Accurately delivers warm water at any desired temperature. Maximum temperature 135° F. Comes with variable or locked adjustment. Capacities up to 100 gallons per minute. Bulletin No. 124 shows applications, prices, and full particulars.
